- District Boundary

Notes:

- Ratio of approximate populated area covered by operational Education Facilities within a parish is calculated by using national standards catchment distance (2.5 km aerial). 2.5km radius circle is equivalent to 19.643 sq.km area (using formula A=Pie*R*R). Approximate area falls inside 2.5km zones are treated as accessible & falls outside are treated as no accessible. Accessibility is based on aerial distance. Assumed that student travel most direct route in plain area.
- Some parishes have no operational education centers within their own parish. However, they still can access facilities from nearby education centres in neighbouring parishes.
- Education coverage presented in this map is based on available locations of operational Education Centres (refer Data Source) from the District. It should be noted that coverage ratios change over time. For updated education information, please contact the respective DEO, MoE, & Cluster Leads directly.
